Conference Photograph vi

Preface vii

Conference Information viii

Investigations of local currents in a semiconductor by single-molecule spectroscopy
J.-M. Caruge, M. Orrit 1

Confocal photoluminescence studies on GaSe single crystals
Y. Fan, T. Schittkowski, M. Bauer, L. Kador, K.R. Allakhverdiev, E.Yu. Salaev 7

Photoluminescence from single silicon quantum dots at room temperature
J. Valenta, R. Juhasz, J. Linnros 15

Investigation of molecular dimers by ensemble and single molecule spectroscopy
Th. Christ, F. Petzke, P. Bordat, A. Herrmann, E. Reuther, K. Müllen, Th. Basché 23

Optical properties of individual nanostructures of molecular J-aggregates
M. Vacha, M. Saeki, M. Furuki, L.S. Pu, K.-i. Hashizume, T. Tani 35

Single-molecule fluorescence of long-chain DOO-PPV conjugated polymers prepared by different oxygen reducing methods
W.-Y. Sun, J.-H. Hsu, S.-C. Yang, J.D. White, W. Fann 41

On sealing effects and oxygen dependence of non-recoverable intensity drops in short-chain-conjugated polymers
J.D. White, W.Y. Sun, S.C. Su, J.H. Hsu, T.L. Lim, W.S. Fann 45

Individual mesoscopic structures studied with sub-micrometer optical detection techniques: CdSe nanocrystals capped with TOPO and ZnS-overcoated system
K. Hashizume, M. Matsubayashi, M. Vacha, T. Tani 49

Absorption and coherent emission of single molecules
T. Plakhotnik 57

Minimal distance between chromophore and two-level systems in amorphous solids: effect on photon echo and single molecule spectroscopy data
A.V. Naumov, Yu.G. Vainer 63

Stark spectroscopy of single molecules in the Shpol'skiĭ matrix *n*-hexadecane
M. Bauer, L. Kador 75

Single-molecule imaging and spectroscopy of adenine and an analog of adenine using surface-enhanced Raman scattering and fluorescence
M. Ishikawa, Y. Maruyama, J.Y. Ye, M. Futamata 81

Slow photochemical transformations of single dye molecules in polymer environment at room temperature
I. Renge, C.G. Hübner, A. Renn, H. Langhals, U.P. Wild 91

Theory of single molecule fluorescence in large molecular systems
A.A. Villaeys, S.H. Lin 97

Micro-spectroscopy of chloroplasts in protoplasts from *Arabidopsis thaliana* under single- and multi-photon excitations
F.-J. Kao, Y.-M. Wang, J.-C. Chen, P.-C. Cheng, R.-W. Chen, B.-L. Lin 107

Nonphotochemical hole burning spectroscopy of a mitochondrial selective rhodamine dye molecule in normal and cancerous ovarian surface epithelial cells
R.J. Walsh, T. Reinot, J.M. Hayes, K.R. Kalli, L.C. Hartmann, G.J. Small 115

On B800 → B800 energy transfer in the LH2 complex of purple bacteria
V. Zazubovich, R. Jankowiak, G.J. Small 123

Persistent spectral hole-burning study on photosystem II reaction center reconstructed with dibromothymoquinone
Y. Kawamata, S. Machida, K. Horie, S. Itoh, M. Iwaki, T. Tomo, K. Satoh 131

Structural relaxation of protoporphyrin-IX-substituted cytochrome b_{562} and its mutants at low temperatures studied with persistent spectral hole burning
Y. Kawamata, S. Machida, T. Ogawa, K. Horie, T. Nagamune 141

Investigation of DNA–protein recognition by satellite hole spectra of labeling dye
T.-C. Chang, J.-J. Lin, K.-C. Lin, Y.-C. Lin, W.-C. Huang, Y.-P. Yang, J.-Y. Cheng 149

Using external field effects for elucidating specific features in dye–DNA interaction
M. Stübner, J. Friedrich, Y.-P. Yang, T.-C. Chang 153

High-pressure study of dye–DNA interaction
K.-H. Huang, C.-C. Chang, Y.-P. Yang, W.-S. Wu, H.-C. Chang, T.-C. Chang 163

Diaelastic pressure-induced broadening of spectral holes in molecular crystals
K. Leiger, J. Kikas, A. Suisalu 171

Hydrophobic hydration in aqueous acetic acid and formic acid solutions probed by high pressure
M.-S. Lin, C.-M. Feng, H.-E. Kao, Y.-C. Huang, H.-C. Chang, J.-C. Jiang, S.H. Lin 177

Non-photochemical versus photochemical hole burning in hyperquenched glassy water and cubic ice
T. Reinot, N.C. Dang, G.J. Small 183

Spectral hole burning and electron–phonon coupling in aluminum phthalocyanine tetrasulfonate doped inorganic hosts with and without water addition
J.-P. Galaup, S. Fraigne, N. Landraud, F. Chaput, J.-P. Boilot 189

Tunneling systems in molecular crystals: studies by optical spectroscopy and neutron scattering
M. Plazanet, A. Geis, M.R. Johnson, H.P. Trommsdorff 197

Spectroscopy, persistent hole burning, and holographic applications of naphtophthalocyanine/haloanthracene systems
R.S. Pandher, A.A. Gorokhovsky, Z. Liu, I.V. Solomatin, D. Psaltis 207

Symmetry and hole-burning properties of porphyrins
I. Renge 213

Rival photochemical hole-burning mechanisms in porphyrine doped polymers
V.N. Krasheninnikov, V.V. Ponkratov, B.M. Kharlamov 221

Near infrared spectral hole burning in Si-naphthalocyanine-doped solids: enhancement of the hole-burning efficiency by co-doping with C_{70} fullerene
S. Fraigne, J.-P. Galaup 231

Photochemical hole-burning in C_{60}–H_2TPP supramolecule doped polymer: a comparative study with the behaviour of separated H_2TPP and C_{60} entities
J.H. Rice, J.-P. Galaup, K. Kordatos, M. Prato 237

Luminescence spectroscopy of C_{70} and $C_{70}Ph_2$ in crystalline toluene at 5 K
J.H. Rice, J.-P. Galaup, P.R. Birkett, R. Taylor 245

Monte Carlo simulation of energy transfer rates: application to downward energy transfer within the 825 nm absorption band of the FMO complex of *Prosthechochloris aestuarii*
J.M. Hayes, M. Ruehlaender, C. Soukoulis, G.J. Small 249

Energy transfer dynamics of thionin investigated by broad non-resonant holes
Y.-P. Yang, J.-Y. Wu, C.-C. Chang, C.-S. Yan, T.-C. Chang 257

Perylene and terrylene in rare gas matrixes: spectroscopic and computational studies of inclusion sites
I. Biktchantaev, V. Samartsev, J. Sepiol 265

Spectroscopic properties and site origin of Shpol'skii system—terrylene in n-nonane
I. Biktchantaev, V. Samartsev, J. Sepiol 273

Recent progress in developing new rare earth materials for hole burning and coherent transient applications
Y. Sun, C.W. Thiel, R.L. Cone, R.W. Equall, R.L. Hutcheson 281

Room temperature persistent spectral hole burning of Eu^{3+} ions doped in sol–gel derived glasses
M. Nogami 289

Temperature dependence of homogeneous line width of Eu^{3+} in sodium aluminosilicate glasses
K. Fujita, K. Hirao 295

Relationship between room temperature hole-burning in glasses and doped Eu-ion concentration
N. Murase, Y. Kawasaki, A. Tomita 301

Semiconductor lasers stabilized to spectral holes in rare earth crystals to a part in 10^{13} and their application to devices and spectroscopy
G.J. Pryde, T. Böttger, R.L. Cone, R.C.C. Ward 309

Photochemical reactions of samarium ions in sodium borate glasses irradiated with near-infrared femtosecond laser pulses
K. Fujita, C. Yasumoto, K. Hirao 317

Observation of optical memory effect due to interference of multiply scattered light by using a focused beam
A. Kurita, Y. Kanematsu, T. Kushida 325

Optical memory based on the long-lived photon echo and optical superradiance in crystals doped by rare-earth ions
V.V. Samartsev, A.A. Kalachev 331

Frequency-domain gratings by simultaneous absorption of two photons
A. Rebane, M. Drobizhev, A. Karotki 341

High bandwidth spectral gratings programmed with linear frequency chirps
R. Reibel, Z. Barber, M. Tian, W.R. Babbitt 355

Temporal and spatial behavior of photon echoes stimulated from long pulses
M. Tian, Z. Barber, T. Chang, R. Reibel, Wm.R. Babbitt 367

Optical dephasing in doped polymers and the soft potential model: analysis of photon echo in doped PMMA
M.A. Kol'chenko, Yu.G. Vainer, R.I. Personov 375

List of Contributors 383
